## Test, Form 3B

$\qquad$

For Exercises 1-5, consider the following situation.
Marylou buys bagels for a number of office staff each day. Each bagel costs \$1.75.

1. Write a function to represent the situation.
2. $\quad y=1.75 x$
3. Make a function table to find the total cost if $3,5,7$, or 9 office workers want bagels.
4. 

| Number of <br> Workers, <br> $x$ | Cost of <br> Bagels, <br> $y$ |
| :---: | :---: |
| 3 | 5.25 |
| 5 | 8.75 |
| 7 | 12.25 |
| 9 | 15.75 |

3. Graph the function.
4. State the domain and range of the function.
5. Is the function continuous or discrete? Explain.

For Exercises 6 and 7, find each function value.
6. $f(7)$ if $f(x)=-3 x+2$
6. -19
7. $f(-8)$ if $f(x)=4 x-5$
7.$-37$
$\qquad$

## Test, Form 3B

(continued)
$\qquad$
8. nonlinear; If you graph the function, the ordered pairs do not lie on a straight line.

The total cost of renting a lawn mower from Lawns Inc. is represented by the function $y=10 x+15$, where $x$ represents the number of hours and $y$ represents the total cost. The cost of renting a lawn mower from Green Lawn is shown in the table.

| Number <br> of Hours | Cost (\$) |
| :---: | :---: |
| 2 | 38 |
| 3 | 47 |
| 4 | 56 |
| 5 | 65 |

9. Compare the functions' rates of change.
10. Find and interpret the initial value of renting from Green Lawn.
11. Which company should you use if you rent the lawn mower for 6 hours?
12. Sketch a qualitative graph that represents a cup of soup quickly cooling down.
13. Graph $y=-3 x^{2}+2$.
14. Green Lawn
15. 

Time
Lawns Inc.: \$10/hour; Green Lawn: \$9/hour.

Lawns Inc. has a
9. greater rate of change.

The initial cost of the rental is $\mathbf{\$ 2 0}$.
10.
13.
